QA360 – Bridging the Gap
in Software Testing

New paths to growth

QA360 team has the ability to design customized testing solutions for each project they work on. This allows them to work in a domain-driven approach, which can help their customers achieve their business goals. Additionally, the QA360 team can build product-based testing assets and use automation test suites to help decrease the testing effort and delivery. By making quality a priority and part of their culture, the QA360 team can help set new paths to business growth for their customers.

QA360 provides a complete and dedicated Quality Assurance solution for all types of businesses. They work with their customers to assess their specific needs and design a testing solution that covers all aspects of their business. Additionally, they provide on-demand access to their team of experts and use the latest tools and technologies to deliver the highest quality results. As a result, businesses can rely on QA360 to help them achieve their goals and empower their business with 360 degrees of quality.

What is QA360 ?

QA360 is a software testing managed team that specializes in designing customized testing solutions for each project. Whatever your project domain, size or type, QA360 team is ready to build the trust in your digital solutions. Our functional Crew framework allows us to decrease the testing effort and delivery while enhancing the relationship between customers and management.

Why hire QA360 ?

QA360 is responsible for ensuring the quality of software products for hundreds of customers around the globe. We work closely with the development team in our projects to ensure that all features are properly tested before release. We also provide support and training to our customers on how to use our products.

Our team is composed of experienced software testers who have a deep understanding of software testing methodologies. We use a variety of tools and techniques to test our products, including manual testing, automated testing, load testing, and security testing. We also have a strong focus on quality assurance, which helps us to identify and fix defects before they reach our customers.

We offer a comprehensive suite of software testing services that can be tailored to meet the specific needs of your organization. We also offer customized services such as test automation and test management.

QA360 team is committed to providing the highest quality software testing services possible. We constantly strive to improve our process and procedures so that we can deliver the best possible results for our clients.
